## Summary

A Junior Full-Stack web developer with a background in Physiology. Recently attended Monash University coding bootcamp and earned a certificate in full-stack web development. Innovative problem solver who's passionate about technology and developing/designing apps and web pages. I am currently seeking any available position where I can expand my horizon and experience, while also allowing me to gain exposure and explore future career options in the web development industry. I am eager and determined for a chance to learn and apply my accumulated knowledge and skill set into the workforce.

## Technical Skills

### Software Platforms/Technologies

- MERN Stack (MongoDb, express.js, React, Node.js)
- Mongoose ODM
- Bootstrap, Tailwind
- MySQL, NoSQL, Sequelize.js
- Apollo GraphQL
- Npm packages including bcrypt, cloudinary, jsonwebtoken etc

### Software

#### Languages

- JavaScript
- HTML5
- CSS3

### Soft Skills

- Fluent in English and Chinese Cantonese, proficient in Chinese Mandarin
- Ability to work effectively as a team with a shared goal and development of communication skills through multiple successful team projects at university and work experience.
- Strong analytical, problem solving, and people-management skills, demonstrated in managerial and service work while financing my education.

### Tools

- Git
- VSCode
- Insomnia
- Heroku

## Projects

**PostItMart** | Github - <https://github.com/jpp2328/project-03> | Deployed - <https://postitmart.herokuapp.com>

- MERN Fullstack Solo Project
- A Social Media Application where logged in users can create/update/view/like/comment on posts as well as add Friends with other users.
- Solo Project, including both front-end and back-end.
- Key technologies: *JavaScript, MERN (MongoDB, Express.js, React, Node.js), Jsonwebtoken, Apollo GraphQL, bootstrap, mongoose, cloudinary*

**CitySpire** | Github - <https://github.com/jpp2328/Cityspire> | Deployed - <https://jpp2328.github.io/Cityspire>

- Collaborative Project
- A travel inspiration website that recommends cities as well as the ability to search for cities. Would display information, map, images, weather and events close by in the selected city.
- I was responsible for implementing the weather and ticketmaster APIs displaying events close by, search history via local storage, modals, code reviews as well as css for the content page.
- Key technologies: *JavaScript, HTML, CSS, JQuery, Tailwind css, Server APIs (Wikipedia, google maps, google places, openweathermap, google geolocation, ticketmaster)*
